

DataVault Secure Data Backup System

Real-Time On-Site Data Backup

Secure & Encrypted Off-Site Backup

ACT DataVault provides secure On-Site and Off-site data security for all types of applications and businesses. Your data is compressed and encrypted with your own unique encrypting key and stored in secure data storage device that replaces unreliable and costly tape backup systems.

- **DataVault On-Site** storage can back up your servers in real-time to protect the latest versions of your data
- **DataVault Off-Site** backup keeps an encrypted version of your key files off-site with full recovery ability for up to 365 days.
- All data is encrypted before backup and maintained that way until recovered by you.
- Easy data recovery using a standard web browser.
