

# ACT Network and Computer Management

## ACT Support Programs

### Remote Network Management

You don't need a tech on-site all the time! Let us monitor your network from our Control Center to provide faster response to problems. Remote monitoring and management of your network can save you time and money!

### Remote PC and Help Desk Support

Most PC problems are not hardware issues. We can provide remote client desktop support and help desk services at a fraction of the cost of an in-house staff!

### Time Block Support

Gain valuable quantity discounts and priority dispatching of service calls. (our highest level of support)

### Rent-A-Tech Scheduled On-Site Support

Schedule a technician for a regular visit to take care of daily network issues or system maintenance.

### Software License Tracking & Management

Don't worry about what software updates are needed and what renews when. We take the hassle out of software license management.

### Disaster Recovery & Secure Data Storage

If your business's computers were suddenly stolen or damaged, how fast could you recover? Let us deal with tricky data restoration & recovery issues for you.

### Corporate e-mail Management

ACT can manage all of your e-mail services using your server or ours.
