

SharePoint Collaboration Services

Today's business environment is constantly changing. More and more workers operate outside of the traditional office. How do you provide these workers with secure access to the information they need to do their job? How about easier communication and data control? Our SharePoint Collaboration solution empowers on-the-road employees and trusted clients to access all type of data easily, affordably and securely.

Share documents, business processes, calendars easily. Introduce data organization technologies and document archiving in your business to add control to the creative business processes.

- Collaboration - Allow teams to work together effectively, collaborate on and publish documents, maintain task lists, implement workflows, and share information through the use of wikis and blogs.
- Portals Create - a personal My-Site portal to share information with others and personalize the user experience and content of an enterprise Web site based on the user's profile.
- Enterprise Search - Quickly and easily find people, expertise, and content in business applications.
- Enterprise Content - Management Create and manage documents, records, and Web content.
- Business Process and Forms - Create workflows and electronic forms to automate and streamline your business processes.
- Business Intelligence - Allow information workers to easily access critical business information, analyze and view data, and publish reports to make more informed decisions.

ACT provides in-house or hosted collaboration solutions customized to your unique environment affordably. Our advisors can guide you to a solution that best fits your needs and budget.
